Wheel nut sockets 1/2" - 17, 19 & 21mm
Impact adapter drive - 3/8" - 1/2"

**DO'S AND DON'TS OF TORQUE****• THE RIGHT DRIVE**

Use the correct drive of torque wrench to suit the size of fastening you need to turn and how much torque you need to apply. The larger the drive the more torque can be applied.

• KEEP IT CLEAN AND DRY

After use always check the tools are clean and dry before putting them away, this will help to avoid problems such as corrosion and moving parts seizing or becoming tight.

• STORE IT PROPERLY

After use return the torque wrench setting to zero and store the tool in its original case or a suitable case that will give adequate protection.

• CHECK IT REGULARLY

All torque wrenches need to be checked periodically and sometimes adjusted. A recalibration fee will apply.

• BE CAREFUL

Torque wrenches are a measuring instrument and need to be treated with care - if you drop it you should get the calibration checked before using the torque wrench again.

• DO NOT USE SCAFFOLDING POLES OR SIMILAR

If the fastening will not turn with the tools you are using you need to use a more powerful tool such as a larger tool or even an impact power tool. Do not use bars to increase the leverage - it is dangerous and can break the tool.

• DO NOT USE A VEHICLE TO TURN THE NUT

Do not fix a torque wrench on to a fastening and then drive the vehicle to force it to turn - needless to say it is dangerous and can break the tool.

• DO NOT USE IT AS A BREAKER BAR

Torque wrenches are for measuring and should not be used as a breaker bar to shift stubborn fastenings.

GROZ, Letter and Number Stamps are manufactured from selected quality carbon steel. Punches are through induction hardened, which gives durability and extended life for repeated use. The hardness at the stamping end is maintained at 58-62 HRC, the striking end is tempered to 38-43 HRC. This prevents the punch from splintering during use. The striking end is chamfered to prevent breakage and accidents due to flying splinters.

BUILD THE WORKSHOP

A system that you can customise to create a racking system that suits your needs.

All of our racking systems are delivered as flat packs and are easily assembled.

Drawer and shelf modules can be added as required at any time. As your needs change your workshop can evolve with you.

TOP OF YOUR DREAMS

Back panels can be used with the workbenches for hanging tools in an easy to reach location.

Drawers have all of the features that you would expect from Teng Tools, ball bearing slides, drawer liners and can be used to store the Teng Tools tool trays. 'Get Organised' in your workshop.
