NEW

TORQUE PLUS RANGE

Compact, lightweight and reliable

Forward/reverse function

Quick release mechanism

Teng Tools torque wrenches have quickly become one of the most used within the automotive sector as well as light industry. This new range of industrial quality 'Plus' torque wrenches are supplied with a fully traceable calibration certificate from the date of manufacture. They are 72 teeth which allows for accessibility in confined spaces and they perform to an accuracy of $\pm 4\%$ which meets international standards.

Get organised™

HOW TO USE A TORQUE WRENCH

Always:

- Always use a torque wrench to apply a specific torque value. Never use it as the primary means of tightening or loosening fasteners.
- Always clean dirty or rusted threads before tightening.
- Always carry a torque wrench with care. A single fall can knock the accuracy off by as much as 30 percent. If you do drop it, get it recalibrated.
- Always store a torque wrench in its protective case when not in use.
- Always apply torque in a slow, methodical manner. Avoid sudden, jerking movements.
- Always grasp a torque wrench in the centre of the handle. If two hands are needed, place one hand on top of the other.
- Always return a torque wrench to the 'zero' setting before storage.
- Always use the correct drive of torque wrench to suit the size of the fastening you need to turn.

Never:

- Never use a torque wrench as a breaker bar. This will damage the torque mechanism.
- Never exceed the recommended working range of a torque wrench.

HYDRAULIC BOTTLE JACKS

**100%
FACTORY
TESTED**

Groz Hydraulic Bottle Jacks

A must for every mechanical workshop or when you need to lift stuff. Conforms to ASME PALD 2009 Standard.

Rugged construction with Smart base plate design - light weight yet sturdy with weight distributed optimally for stability and durability. 100% factory tested with 50% safety overload factor. Ideal for use on heavy duty trucks, agriculture, construction, mining, automotive, and marine applications where lifting, pushing, spreading, bending, pressing, or straightening are required.

Atlas Copco

Professional Aluminium Block Piston Compressor

Stock No. AB31E90

3hp 244L/min @ 9.5bar

Automan oil-lubricated aluminium piston compressors are solid, robust and reliable. They are designed for professional applications where they offer trouble-free performance even under demanding circumstances. 2-10hp models available.

Start / Stop / Auto Switch...

The built-in, adjustable switch allows the compressor to run automatically and maintain set pressure in the air receiver, giving peace of mind to the operator.

Heavy Duty Air Intake Filter...

The high quality filter is installed on the 400V 3PH 7.5/10hp units and provides better oil performance.

TEFC Motor...

The Automan's European-made motor has a long life time and is weather resistant thanks to Class F insulation and IP54 protection.

Block...

Thanks to its low running speed, the Automan AB-Series block has a long life

Pressure reducing valve with quick coupling...

The manually adjustable reducer is equipped with a quick coupling so it only takes seconds to add a new application to the compressor.

Tank...

The Automan's tank is powder coated, giving it the best protection against damage and corrosion.
