WELCOME TO TENG TOOLS

At Teng Tools we believe in order and clarity.
That is professionalism at work or pure enjoyment after work.
Some think perfect organisation is tedious. We consider it to be
one of man's most basic needs.
Join us – Get organised!

Our Customers

Our customers are found in all fields from large industrial companies and vehicle manufacturers to the major names within racing as well as your neighbour in his garage. With the help of our range, which includes close to 3,000 products covering tools and storage solutions, we help companies to streamline their operations. Good tools are an important part and the organisation of them is just as important.

NEW

TORQUE PLUS RANGE

Compact, lightweight and reliable

Teng Tools torque wrenches have quickly become one of the most used within the automotive sector as well as light industry. This new range of industrial quality 'Plus' torque wrenches are supplied with a fully traceable calibration certificate from the date of manufacture. They are 72 teeth which allows for accessibility in confined spaces and they perform to an accuracy of $\pm 4\%$ which meets international standards.

Get organised™

HOW TO USE A TORQUE WRENCH

Always:

- Always use a torque wrench to apply a specific torque value. Never use it as the primary means of tightening or loosening fasteners.
- Always clean dirty or rusted threads before tightening.
- Always carry a torque wrench with care. A single fall can knock the accuracy off by as much as 30 percent. If you do drop it, get it recalibrated.
- Always store a torque wrench in it's protective case when not in use.
- Always apply torque in a slow, methodical manner. Avoid sudden, jerking movements.
- Always grasp a torque wrench in the centre of the handle. If two hands are needed, place one hand on top of the other.
- Always return a torque wrench to the 'zero' setting before storage.
- Always use the correct drive of torque wrench to suit the size of the fastening you need to turn.

Never:

- Never use a torque wrench as a breaker bar. This will damage the torque mechanism.
- Never exceed the recommended working range of a torque wrench.

SOCKET SETS ACCORDING TO TENG

Clip rail socket sets

These clip rail socket sets consist of 6 point deep metric sockets made from chrome vanadium steel with a satin finish. All of our sockets are produced according to the Teng Tools "hip grip" system, which means the socket grips on the flat surfaces of the nut rather than the corner.

3/8" Drive
Stock no. M3807

List Price: ~~\$42.50~~ **\$32.00**

Available in 1/4", 3/8" & 1/2" drive.

1/4" Drive

A **22 piece** socket set containing 4mm to 13mm regular 6 point sockets. It also includes a 60 teeth ratchet & accessories. It is stored in a plastic case with snap lock & metal pin hinges.

BUILD THE ULTIMATE WORKSHOP

3 Zones. Infinite Possibilities.

READY STEADY GO

TRADE STUDENTS IN NEW ZEALAND READY TO GO

When Wintec (Waikato Institute of Technology) wanted an optimised workflow for their students, cost effective production and training outcome, and a safe work environment with little to no congestion, they chose to implement the Ready, Steady, Go system.

Wintec, a trade training facility in Hamilton, New Zealand, providing education to about 1,000 students annually, approached Teng Tools with ideas for a new workshop setup where the primary goal was to optimise the students' workflows. After searching globally for a system that would work for them, they decided on the Teng Tools Ready, Steady, Go system, and since they were already using Teng Tools, this was an opportunity to further the cooperation.

PLANNING, SORTING AND SAVING TIME

One of the challenges in the existing student work area was multiple students using the same cabinets and tools being placed back differently each time. Objects were lost and unnecessary time was spent searching for them, not to mention the huge costs for replacing the ones that went missing. Items also got spread out and dislocated since there was no natural collection point close to the work zone. Also, rarely used but essential tools took up desirable workspace due to the lack of a good unit to store them in. There were even some safety issues, with people reaching into drawers or cabinets and getting cut on loose tools.

To plan for the Ready, Steady, Go system, Wintec and Teng Tools got together to analyse the existing work environment, the projects and what tools were required in specific areas. With this exercise completed, Wintec would be able to cut down on congestion, save time, be more efficient and provide a better work environment. When the

processes and needs were all mapped out, the second step was to sort through the entire inventory and get rid of unnecessary items. The third and final step was to plan the new workshop area according to the Ready, Steady, Go zones.

A CLEAN SLATE FOR THREE NEW ZONES

The design plans and installation included three key areas:

The Ready zone is where Wintec placed tools that the students can lean on but that are rarely used.

The Steady zone, located close to the Go zone to avoid wasting time moving back and forth, they placed the ranges of tools that the students use every day. Students have a clear overview and a logical system for these tools.

The Go zone is where the students perform the actual work. Here there is sufficient work surface space for the mobile tool solutions. They also have access to tools, liquids, and other necessities.

Wintec wanted a clean slate for the installation of the new system and started by dismantling the existing work area. From tear down to completed installation and test drive, the new Ready, Steady, Go system was up and running in just three days.

The benefits of the new system where Wintec and their students now know that they have the right setup at the right place at the right time – every time – were obvious from the get-go: increased work efficiency, a more secure workplace with a natural workflow, a higher production frequency and a cost effective execution. Matt Williams, operations manager at Wintec, says that they are really happy with the Ready, Steady, Go system and highly recommend it to others. □

STEP
1

CHOOSE STORAGE

Choose the storage that suits you. If you are on the road a mobile storage unit may be best or if you have a permanent workspace perhaps a roller cabinet with workbench is the answer.

Top Box

8 Series 6 Drawer Top Box

A sturdy top box with 6 drawers all secured with a key lock. All drawer fronts are plain and no drawer mats or tote tray are included. It is also supplied with a metal side handle.

Stock no. TC806SV

List Price: \$369.00

\$339.00

Mobile Trolleys

Work trolleys with two shelves & a ball bearing slide drawer. They are supplied with two fixed & two swivelling castors with brakes for maneuverability. Two different sizes are available, 700mm wide and 1,339mm wide.

Stock no. TR135

List Price: \$999.00

\$919.00

Stock no. TR070

List Price: \$569.00

\$529.00

Roller Cabinets

9 Series 'Soft Close' Roller Cabinet

A 9 series roller cabinet with 7 soft close drawers each with an individual closing mechanism and all secured with a combination lock. It also includes a heavy duty side handle and two fixed and two swivel 5" castors with brakes. It is also supplied with an ABS top mat with storage compartments and a protective mat in each drawer.

Stock no. TCW907X

List Price: \$1,349.00

\$1,150.00

Modular Racking

Easy to assemble, sturdy modular racking units are now available. They would be ideal for use in any workshop area. Different shelving configurations are available.

The pictured racking is two metres high with adjustable feet. It contains a four drawer module, 1 sliding shelf, 3 standard shelves and 1 four drawer module. It is 700mm wide.

Stock no. RSK0700A

List Price: \$1,225.00

\$1,129.00

**Multiple
racking
options
available!**

7 Series Roller Cabinet

A 7 series roller cabinet with 7 drawers all secured with a key lock. It also includes a metal side handle and two fixed and two swivel 5" castors with brakes. All drawer fronts are plain and no drawer mats are included.

Stock no. TCW707EV

List Price: \$769.00

\$689.00

STEP 2

CHOOSE TOOL TRAYS

Choose the tools you need to do your daily work. Our range includes over 3,000 products in sets that fit into the Get Organised system.

EVA Sets

3/8" Drive Socket Set

A set containing 3/8" drive regular and bit sockets with a range of accessories. Regular sockets range in sizes from 8mm to 22mm. TX bits and Hex bit sockets included. The set also includes a 72 teeth ratchet, rotating spinner handle, 3" wobble extension bar, universal joint and adaptor.

Stock no. TED3836

List Price: \$255.00
\$187.00

1/2" Drive Impact Socket Set

A 21 piece set containing 1/2" drive regular and deep ANSI standard 6 point impact sockets ranging in sizes from 13mm to 24mm. Also included are 3" and 10" extension bars, a universal joint and two types of adaptors. These tools are especially designed for use together with pneumatic tools.

Stock no. TED9121

List Price: \$349.00
\$255.00

Pliers Set

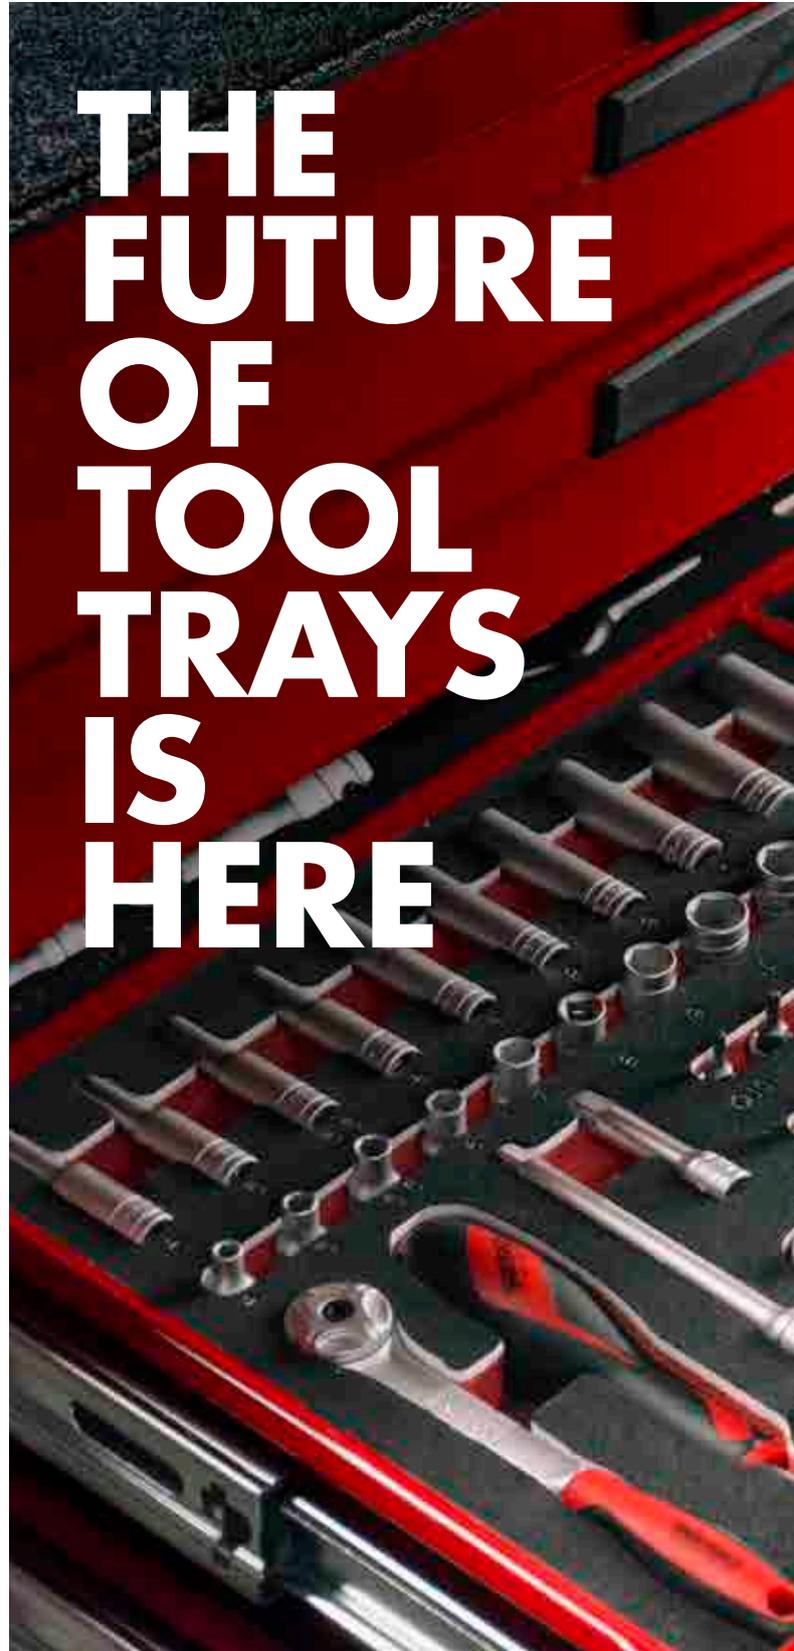

A 5 piece plier set which includes a 5" side cutters, 6" heavy duty side cutters, 8" long nose pliers, 8" heavy duty combination pliers and a 10" water pump pliers. The ergonomic handles are wider where needed to support the palm of your hand when using greater force.

Stock no. TED441-T

List Price: \$279.00
\$203.00

THE FUTURE OF TOOL TRAYS IS HERE

TC Sets

1/2" Drive Socket Set

A 17 piece set containing metric 6 point sockets ranging in sizes from 10mm to 24mm. This set also includes a ratchet, extension bars, adaptor and universal joint.

Stock no. TT1218-6

List Price: \$205.30

\$137.00

Impact Sockets Set

A 24 piece set containing 1/4" and 3/8" drive regular and 3/8" drive deep impact sockets in sizes from 6mm up to 19mm. A 3/8" to 1/4" drive adaptor is also included.

Stock no. TT9024

List Price: \$166.70

\$112.00

Screwdriver Set

A 7 piece screwdriver set including flat as well as PH and PZ head types. Features include TT-MV PLUS steel blades and ergonomically designed bi-material handles with hanging hole and T drive facility.

Stock no. TT917N

List Price: \$94.50

\$54.90

Anti Slip Combination Spanner Set

A newly designed 12 piece metric combination spanner set featuring a typically Teng design that gives an anti slip grip on the open end. Spanners included range in sizes from 8mm to 19mm.

Stock no. TT8012

List Price: \$199.00

\$134.00

3/4" Ratchet & Accessories Set

A 4 piece 3/4" drive set containing 72 teeth ratchet handle with quick release and twist reverse, 200mm and 400mm extension bars and sliding T bar. The ratchet has more teeth which are engaged simultaneously - which means you can use greater force without the mechanism failing.

Stock no. TTX3404

List Price: \$476.40

\$299.00

3/4" Drive Socket Set

A 14 piece set containing 6 point metric sockets ranging in sizes from 19mm to 50mm. These sockets are made from chrome vanadium steel and are produced according to the Teng Tools 'Hip Grip' system, which means the socket grips on the flat surfaces of the nut rather than on the corner.

Stock no. TTX3414

List Price: \$327.10

\$219.00

Hand File Set

A set of 5 files. Flat, hand, half round and three square types included. All files are 10" in length.

Stock no. TTXF05

List Price: \$125.30

\$85.00

Endless combinations.
You choose the layout.

Stock no. TCMM1055N

List Price: \$6,425.00

\$5,899.00

All sizes of tool kit configurations are available!

DETERMINED TO WIN

A punctured lung, a broken elbow and a dislocated shoulder. Any ordinary patient suffering from just one of these injuries would be completely incapacitated, focusing on nothing but the pain and the recovery process.

Not Jason Doyle.

As he lay there in a Polish hospital bed suffering from all three after crashing in his opening ride at the Torun Grand Prix there was only one thing on his mind. His home round in Melbourne, Australia and the 2016 Speedway World Championship.

With that, he turned to his shocked pit crew and told them to prepare his bikes for the flight. The world title dream was still alive.

But it was not to be.

The seriousness of his injuries meant that he was unable to fly. It had been a courageous effort. The Swindon Robins skipper had led the series into Torun after claiming three successive Grand Prix victories but was slammed into the protective barrier when British rider Chris Harris lost control of his bike and crashed in heat three.

American Greg Hancock took over at the top of the standings after Doyle's crash but the Australian still could have unseated him in Melbourne.

"I made a good start. I went up the back straight thinking I could go into the turn and a really good position".

"The next thing I could see was Bomber (Chris Harris) letting go of his bike and pretty much from then on it was like a rocket going into the fence".

"Laying on that track in Torun I did not know what was broken. I didn't know how badly injured I was until I got to hospital and my life actually flashed before my eyes when they were sticking the tube in me".

Fortunately, Jason made a full recovery and is back on the track.

Triumphantly returning to Torun only a few months after that fateful day, he secured second place in the world pairs championship after the first round with three race wins and three second places. He's now determined to win the FIM Speedway Grand Prix World Championship.

Perseverance, unrelenting motivation and sheer determination coupled with an abundance of natural talent mean that one day, he will. □

Jason Doyle

1000 Volt Insulated Tools

1000 volt tools must always be used for electrical work. A Teng Tools tested and approved insulated tool can protect a user against voltages of up to 1000 volts. They conform or exceed all specifications that the relevant authorities have established.

The screwdriver shaft is covered with two layers of insulation in different colours that make it easy to see if the insulation has been damaged. The blades are insulated before the handle is moulded, which makes the screwdrivers safer.

This 7 piece set includes flat and PH head types and a voltage tester. The rack holder is ideal to attach to tool panels above a workbench or to mount directly on the wall.

Full range of insulated screwdrivers & pliers available!

Adjustable Wrenches

At Teng Tools we are proud of our range of adjustable wrenches. You can find a wrench for every need; the range includes the classic model in eight sizes with a capacity up to 70mm, the ergonomic model with a comfortable handle in five sizes, the extra wide opening range and one model with a pipe grip at the end.

All of our adjustable wrenches exceed specifications in the international standards. A 15° jaw angle means that wrenches can be used in confined spaces.

The pictured wrench is part of the wide jaw opening range. The integral measurement scale on the jaws makes it easy to accurately measure the size of nuts. It is made of high grade chrome vanadium steel with a phosphate surface and is available in four sizes from 7" up to 12".

**THE
WORLD'S
BEST
CARS
REQUIRE
THE
WORLD'S
BEST
TOOLS**

TOOLS FOR SUPERCARS

For most people, the best is good enough. For a few, only the very best will do. When working with some of the world's most prestigious car brands, it goes without saying that all equipment and tools used in production must be of the highest quality throughout.

Farsund Aluminium Casting (FAC) have an impressive customer base. For example, how about getting to work for Jaguar, Bentley, Ferrari, BMW, Audi, Rolls Royce, Mercedes and Porsche on a daily basis?

“**We use the tools we deem are the best.**”

- We deliver suspensions for all these cars. That is our speciality. The suspension is cast around a core of sand, which means that we manufacture parts that are hollow, casting aluminium around the core, says Einar Johansen, area manager at FAC's casting workshop, who has the overall responsibility for all maintenance of the moulds in the workshop.

Tools for supercars

With demanding customers, great tools are also required. It is therefore natural for FAC to use Teng Tools.

- Previously, we have used several different types of tools. A few years ago we started using Teng Tools to a greater extent, and today we have eight tool cabinets for our 24 employees. Teng Tools provide good storage and tools at reasonable prices.

“**The tools are solid and durable, and that is important to us.**”

Johansen says that the brands they work for have no formal requirements as to which tools are used, but that FAC themselves use the tools they deem the best.

- And there are also a few special tools that we have modified to gain access in tight spaces, but Teng Tools' product range is very wide - they have most of what you may need. And the tools are solid and durable, and that is important to us.

High quality and orderliness

One of the major benefits of Teng Tools' roller cabinets, Johansen says, is that all the tools are kept in specific slots. The compartments in the cabinets are also great, making it easy to find the tools and put them back in the right spot: A must when several mechanics use the roller cabinets. We work across a large area and the cabinets are easy to roll around. High quality, good price, fast service.

- Johansen has no trouble recommending Teng Tools to other companies.

- We are, without a doubt, very satisfied with the tool cabinets that we have here at FAC, he concludes.□

FRP Ratchets

Teng Tools steel reinforced fibre ratchets have been designed to create a 45 teeth (8 degree increment) ratchet with quick release and flip reverse to meet or exceed all internationally recognised quality and torque specifications. The design protected ratchet (24583ROC) is not only lighter and just as strong but is also much more comfortable to use than regular ratchets. Bi-material handles for a more comfortable grip.

Stock No.	Drive	List Price	Special Offer
1400FRP	1/4"	\$59.20	\$37.00
3800FRP	3/8"	\$85.90	\$53.00

72-Tooth Ratchets

The latest generation of industrial style ratchets from Teng Tools with 72 teeth to give a 5° increment between clicks for good access in confined spaces. A slim design together with a bi-material grip, and twist reverse all combine to make a comfortable to use ratchet. An uncomplicated mechanism with several teeth engaging simultaneously for higher torque capacity, extended life and easier servicing. Ideal for use in confined spaces and where a smooth action is required.
